CLIPS, QUOTES and COMMENTS is issued on the first and fifteenth of each month, by the Borderland Sciences Research Associates, at: 3524 Adams Ave., San Diego 16, California.

Twelve issues (6 months) for $5.00; six issues (3 months) for $2.50; two issues for $1.00. Contains mostly short articles and miscellaneous material, supplementary to the BSR bi-monthly ROUND ROBIN.

N. Meade Layne, M.A., Director -

- A CARD OF THANKS -

(and more than a card-full - - - - -)

TO THE MANY ASSOCIATES and FRIENDS

who have sent us donations, special greetings, and good wishes for the Holiday Season and the New Year. We have found it impossible to reply to all of you individually by cards or letters, but we have thanked you in thought many times.

A special word here of appreciation, for the efforts of Regional Director MILT R. SWANSON (1015 Boston Post Road, Marlboro, Mass.) Aware that the B.S.R. was in financial difficulties, Director Swanson prepared and sent out a letter to all Associates - many of whom in their turn sent us donations, and new memberships and renewals, the total being sufficient to pay for the new-and-necessary office equipment and operating expenses pro tem. All of us are indebted to Director M.R.S., and everyone at Hdqrs. is indebted to all of you. . . .

And the deepest satisfaction, of course, to me as your National Director, is your repeated assurance that the BSR publications are wanted and needed and are doing a useful work. Stay with us even though the "times be shortened".... 'There is a sound of a going in the mulberry tops'....

Divobequa --

Meade Layne, M.A.,
B.S.R. Director-

# NINETEEN PARAGRAPHS
## (Ultrasonics & the Aeroforms)

In the following pages I wish to offer our Associates, in very condensed form, certain facts of extreme importance. They are not facts that can be 'proved' at this moment, but I believe that in time to come they will be recognized as being basically correct.

These facts explain and clarify many phenomena connected with the UFO (aeroforms, Discs, 'Saucers'), and with both real and alleged experiences of persons who claim to have entered these 'craft' and to have ridden in them.

This material is offered in the same spirit with which in the fall of 1946 we gave the Etheric ("4-D" or Emergent) interpretation of the 'flying objects'. That interpretation has never been shown invalid, or supplanted by any other. It has been disregarded, sometimes derided, has gained ground slowly, remains today the only workable explanation offered anywhere. It is not, however, altogether easy and quickly understood - at least by the multitude whose minds are adversely preconditioned to it. We merely felt that it was a public duty to make this interpretation accessible - not to advocate it in a spirit of propaganda.

I have often explained but do not here restate the sources of the Etheric explanation. It was not any personal invention of my own or of my associates. For the time being and for reasons of 'policy' I do not give in this article the source of these additional data - but shall be glad to give this information to individuals requesting it.

1. It is true that a few human beings ('Earthians') have entered Discs and other aeroforms and have taken short rides in them.

2. No 'Earthian' has travelled in an aeroform to a distance which could be described as 'beyond gravity', or beyond the earth's magnetic field. No earthian has visited the moon, or Mars, Venus, or any other planet, in his normal physical body.

3. No Earthian can make an interplanetary or true space flight in an aeroform while in his normal physical body. Such a flight would be possible provided his body were reconditioned prior to entering the aeroform. But further --

4. This reconditioning would consist in a time-measured dosage of high frequencies produced by small electronic devices - and -

5. True space flight, even if achieved by a human under the protection mentioned, would result in amnesia and serious physical disorders.

6. Recurring to "4" supra: An aeroform at rest is enveloped by a field of supersonic frequencies; and an aeroform in flight gives off a field of ultra-sonic frequencies.

7. Ultrasonic rates actually convert the aeroform, and the bodies of all persons inside of them, to waves of light. Etherean beings in this condition retain full consciousness and full control of their 'ship'. But no normal human can survive this conversion unless previously conditioned by time-measured dosage of high frequencies. Even if so protected, it is very doubtful whether he could return to normal earth life, or survive for any considerable length of time... The conditioning affects the blood stream and the bone marrow and prevents the blood from "boiling" - but in the end produces amnesia and hemorrhage... The subject being conditioned would not necessarily be aware of what was being done. .. Ultrasonic frequencies loosen the cell structure but do not disintegrate the cells.

8. Travelling as a light wave the Etherian is able to control his (light-wave) craft by mental energies and by the use of ultra-sonic frequencies.

9. The speed of light in free space is without limit. In occupied space (planets and other bodies) light is affected by gravitational pressures. In free space therefore, transition is instantaneous. A change of frequency is equivalent to a change of position or location. (An electron is believed to change its orbit "instantly", i.e., without using time to do so. .... Cp. Natalli on the time vacuum.- ml)

10. Ultra-sonic frequencies produced by electronic devices can act as a gravity screen (shield). A resting Disc can cut off the gravity pressure from any angle, and will then be thrown off into space by gravity itself - or -

11. When the material of which the craft appears to be made has its vibratory rate raised to ultrasonic frequencies it becomes invisible and intangible ipso facto.

12. When converted as in "11" sup., the craft may remain in situ, translucent, transparent and invisible, tangible or intangible; or it may depart without being perceived.

13. Recurring to "6" sup. Conversion to ultra-sonic frequencies affects all parts of the body at the same instant, and the Etherians experience no ill effects. They can travel as conscious living light waves, or in bodies resembling our own at another frequency.

14. From this point of view ("13") it is possible to describe the aeroforms as the living bodies of etheric entities (as has been done). The 'ship' and its 'crew' alike become light waves or frequencies of the ether; while consciousness continues to abide in the entities - who may be unaware of physical changes in themselves.

15. According to their vibratory rates, the ether ships pass through each other and through other objects, and penetrate the depths of the sea and the 'solidity' of earth. The ultrasonic force field about them will also on occasion destroy aircraft and other objects, with effects resembling those of extremely violent collision. Mantell's plane, and his body, were almost certainly destroyed in this manner.

16. As often pointed out by us heretofore, there is no crossing of space where transit of free space is in question - since the speed of light is then without limit, instantaneous, not requiring time. Light does not "cross space".

17. It is known by experience that resting Discs are often dangerous to touch (v."6" sup.). It is possible that some persons may be less affected by supersonic frequencies than other; this may account for the selection of certain persons by the Etherians. It is also possible that some such persons are now showing signs of amnesia and other physical and mental deterioration. (These are my own conjectures only: m.l.).

18. Recur to "16", last sentence, Light etc. There is a gravity time-lag in occupied space, but light and darkness are permanent conditions of the ethers, or frequencies of the ethers - not 'something that is going somewhere'.

19. Persons abducted by the ether-ships are treated by time-measured doses of ultra-sonic frequencies, are usually landed on other planets and suffer amnesia with respect to their earth lives. It is said that they are well treated.

Jessup's concept of neutral zones (of gravity) in space is correct, according to the source from which these present data emanate.

This is the first public statement of these data, which are certain to require additions and changes of phraseology. (ML)

THE ANSWER TO OUR SILENCE?

BSR Associate D.C. LeV. reports on the probable program of the Etherian visitors. The Associate is a resident of Arcadia, California. This is part of her letter to the BSR Director.

"Dear Meade Layne:

"I have some very interesting facts to relate that I feel confident you will find of interest also.

During the past two years I have been in constant contact with our friends from space, and their visible activity here over Monrovia. Shortly after continued nightly appearance over this vicinity, there was an urgent call put out over the radio and TV as well as in the newspapers for ground observers for the town of Monrovia. One night alone a ship struck across the sky here 21 times before we gave up the count. There was heavy flashing behind the nearby mountains and on one occasion people called frantically in to the police and asked if there was a flying saucer behind the hills. This incident amused us, for the simple reason that we had been told to go to a certain area and had taken a neighbor along with us. The ship illuminated the hills brightly about seven times. The following day an article appeared in the local newspaper to the effect that so many had called in that they finally contacted the Edwards Air Force Base and received the reply that it was due to aerial photography. This was a good laugh for all of us here as we knew what it was, having been told of it beforehand. Although not really funny, of course. It shows how the people are being hoodwinked. This happened almost two years ago. I have a copy of the clipping.

"I am not going into detail as to numerous similar experiences. I thought of telling you about them but decided you received many letters from other people with like exper iences. This has developed during the past two years to a degree that is astonishing.

"Several months ago they gave me instructions to start talking. By this time I had sufficient mental contact to assure guidance.... I can't say that I am much of a public speaker... The talks I give are never prepared; I say whatever comes at the time and it always fits the group to which I am talking.

"Several weeks ago I was on my way to Fontana to speak for a Saucer Club when the ship buzzed me and told me that if conditions were right they would demonstrate for the group after the talk. I of course announced this to the group before speaking, and as soon as the meeting was over everyone retired to the yard. It was bitterly cold and after a few minutes of waiting the group gave up and went in-doors. They had no sooner gone in when the first ship struck through the sky. Striking back and forth across the sky in the same area several times, it put on quite a show. It left absolutely no doubt in the minds of those watching. I was kept in constant mental contact with the ship and was told of each move they planned to make. After the ship had gone over for about six times, I requested if they would please give some flashes for the group and they responded immediately by illuminating a nearby hill. I requested that they please repeat it just for good measure, and they complied.

"The group then returned to the house. The ones who had given up were bitterly disappointed. After a few moments the signal was given to return to the yard and this time they repeated the performance. Everyone had the chance to see.

(cont.)

"A week or two after this I was invited as a guest to another club meeting and to recount some of my experiences. I was told by the ships that they would show themselves to this group also. They did, indeed. This time in addition to the above described performance, they sent a fire-ball in front of the entire group.

"Now, here is the idea as they give it to me. This is going to be their answer to the SILENCE that is being enforced as regards their presence here. Using me as a channel they intend to inform the people of their presence and why. What they a r e planning to do and what cooperation they expect. The knowledge they have supplied me as to who they are, and why, etc., is truly astounding. Most are missing t h e boat on this one.

"Over a year ago they talked about taking me up in one of the ships, but this idea has been changed. For one person to be taken aboard ship and then to attempt t o share that experience with others, just isn't convincing enough. Many who are ready to believe do accept it, but this isn't something for the few to know. By this method now being started, everyone will have an opportunity to see them and draw their own conclusions. They state that they will demonstrate for any group, weather conditions permitting.

"Incidentally, I had quite an experience regarding the supposed ships (Discs) at the Edwards Air Base. Shortly after the first report came out I was talking to an officer from there. Through a bit of trick wordage I was given to know there were three of them there at that time.

"You sure do struggle to uphold the Etheric origin of these visitors. Where's the doubt? Can there be another answer? They leave no doubt in the demonstrations they give for groups. They are in and out as fast as a gnat can blink an eye. I can see no complication here, and when it is explained it becomes easy for anyone to comprehend. Even a dyed-in-the-wool materialist, if he wants to hear.

"Things are happening fast, and the first of the coming year will be a busy one. Same info coming through all channels."

(signed D.C. Le V. 12-15-55)

COMMENT:

I do not think many people will question the basic fact of telepathy, and at least the possibility of telepathic interchange between humans and whatever intelligences may operate the UFO. If we have a situation where a definite advance agreement can be made, by telepathic means, for a display of certain phenomena (Discs, fireballs, light flares, or other) - and then these phenomena occur at the time and place agreed upon, in the presence of numerous witnesses - then we indeed have an answer to the "conspiracy of silence".

---

We have a note from Dr. Thomas E. New, of 651 Copeland Court, Sta. Monica, Calif., inviting correspondence with scientific workers, particularly with respect to research in "borderland" problems. He has been actively concerned, for nearly half a century, with both practical and theoretical engineering in many branches, and now wishes to again associate himself with one or more experienced investigators with similar interest. Address as above, or in care of BSRA Hdqrs.

AFTER MANY DELAYS WE CAN NOW ANNOUNCE THE MIMEO-REPRINT OF THE MORLEY-MARTIN EXPERIMENTS - and - EXPERIMENTS OF DR. CHARLES W. LITTLEFIELD. Brochure, 21 pgs. of surprising and very important material. Price $1.00.

THE POPE'S VISION

From article in Chicago Daily Tribune of Nov. 22, 1955

The Vatican Statement & Oggi Article

. . . . The Vatican press office issued this statement: "This press service office has been authorized to confirm what has been announced by the weekly illustrated 'Oggi' in it's issue of Nov. 24 about the vision of the holy father in the course of his illness of December, 1954.

The Oggi article said: "The secret about the episode was kept until now, and only the affectionate indiscretion of one of those knowing it enabled us to learn and tell of the marvelous episode, which undoubtedly will deeply move the Catholic faithful all over the world."

"The holy father is perfectly sure he saw Jesus-- it was no dream; in that moment he was fully awake and clear minded. On the following day, when it seemed there were no hopes left, when the world's newspapers already had been circulating with forecasts of a forthcoming grave catastrophe, the ailing pope started to improve in such a sudden manner that many people considered it a miracle."

Oggi said that when the pope's illness from a gastric disturbance reached a climax, the pontiff began reciting the prayer "Anima Christi (Soul of Christ)." When he came to the invocation "In hora mortis meae vocame me" (in the hour of my death, call me)," the pope saw "the sweet person of Jesus Christ at his bedside."

"In that moment," said the magazine, "the holy father believed that the Teacher came to call him to Himself, and, serenely answering to the call, he continued the prayer: "Jube me venire ad te (order me to come to you)." Jesus, however, did not come to take him, but to console him and give him the certainty that his hour had not come.

The announcement of the pope's vision recalled the announcement three years ago by Cardinal Tedeschini, archpriest of St. Peter's basilica, that Pope Pius saw a vision of the Virgin Mary in October, 1951.

Various saints of the church have had visions of Jesus, according to the Roman Catholic writings. These have usually seen him, however, in the form of the infant Jesus. Among them were St. Anthony of Padua and St. Christopher. . . . " *

- - - - - - - - - - - - - - -

* As OGGI points out in the remainder of its article (not quoted above), examples of similar visions are indeed numerous - but certainly not confined to those of Catholic faith, or any other. All religions, faiths and cults abound in the mystical and miraculous - and in Protestant and Catholic christianity the vision of the Great Piscean is perhaps most common of all. There are few spiritualist mediums (of a religious turn of mind) who have not seen the Master repeatedly, or at least make such claim.

The only comment I can make here is an obvious one - that every event of a mysterious or "mystical" type is seized upon by devotees of this-or-that faith, and announced as 'evidence' or 'proof' of such-or-such teaching or dogma. Nor does the vividness and clarity of such experiences 'prove' anything at all, except that they were vivid and clear to the person concerned... As Charles Fort remarked: "if the data of relgionism were washed clean of holiness we would have something." This was very rude of C.F., but then he was not a very tactful person - Deo gratia!

ml

EXCERPT FROM ARTICLE IN SAUCER NEWS, DEC.- JAN.'55- '56

by M. K. Jessup

. . . . Frankly (and the Air Force notwithstanding), my research since writing "The Case" has disclosed to me a most awesome vista of the history of Man, and of UFO activity. In "The Case", I thought that I had run the gamut of common denominators. I was wrong. The breadth of circumstance underwriting the UFO is as broad and comprehensive as the history of Humanity - and I believe it is broader. Much broader, possibly.

. . . . . Now, about "little people": "The Expanding Case for the UFO" will greatly stress and amplify the part played by "little people" - pygmies - in a development spanning 35,000,000 years of terrestial history. No, I cannot prove it, but the theory fits, all along the line. One quarter of "The Expanding Case" will be devoted to "little people". They were here, as a fully developed race, in tertiary times, when the coal beds were forming. If at any time (or times) they spontaneously developed a civilization lasting 10,000 years, this would have been 1/3500th of the life span of their race, and such an upsurge could have happened and been wiped out 25,000,000 years ago. The pygmies of today are related to no other race, not even their immediate neighbors. Some of them speak a language that cannot be associated with any known tongue. They are scattered over the Earth in isolated tribes, with no indication of how they got there unless by aerial transport. Little people built Sacsahuaman's intramountain tunnels and caverns. Little people built Zimbabwee. Little people- the picts and gnomes - inhabited Britain. Little people built caverns in Europe, too small for normal humans. Throughout the world little people have left traditions and legends of "supernatural powers" - magic, if you will. Many of the extremely ancient artifacts from coal beds and rock quarries, and even falling from space, are small and delicate as if made by little hands. Some of the pygmies have a god called Puluga, who is supposed to live in the sky in a stone mansion and to have a green wife! Some of the pygmies have a god who comes to Earth in a controlled storm cloud.

If pygmies, in a pre-cataclysmic civilization, invented or discovered levitation and space flight, and took to space for any reason, there is considerable evidence that they are now returning, and they do not like what they find. Certainly there are too many reports of "little people" associated with UFO's to be brushed off. In the 13th Chapter of St. Mark, Jesus says that the Son of Man will return as a glorious shining power, through the clouds. Is the descendant, or son, of Man a race of pygmies- returning from a far journey? If so, where did they go? Where have they been? Why are they returning? - The 13th Chapter of St. Mark is very interesting to "Ufology",i.e., the study of flying saucers. (end)

---

Several years ago we warned and entreated the Air Force authorities to rescind a reported order permitting our aircraft to fire on UFO's - and actually secured some attention. In the current URANUS, however (Dec. 1955), C.A. Heathcote describes such an attack by jets, in the Rockford area, and quotes several other instances (from ORBIT), including a hit by a NIKE on a "Saucer". The writer in Uranus says, that he prints these data "in the belief that it is time people knew more about the kind of reception we 'civilized' beings are giving to our visitors.... This is a matter which raises supernational issues". 'The July and August issues' of Orbit' (continues Mr. Heathcote) 'gives a number of reasons for a possible change in A.F. policy. ' My own feeling is, that the character of the incursion is changing somewhat, and that there is real concern, amounting to alarm in some quarters, over the whole situation. (ml)

Correspondence
and Miscellaneous

Memo. from Assoc. )
Hugh A. Brown. .. )

"I enclose a page from the Dec. 19 NEWSWEEK. Under WYOMING "Now they were two" is a statement that a St. Bernard dog repeatedly went to sleep on the spot where the body of his mistress had been buried. This reminds me of the death of Tom Alyea, of Rutherford, N.J., about 65 years ago. He was buried about 1000 yards from his late residence. I was told at that time his St. Bernard dog used to go and sleep on his grave. Possibly this may show an extra-sensory perception, felt by St. Bernard dogs, caused by energy radiations emanating from the flesh after death.. . .

Carbon 14 is now being used to date the remains of animal and vegetable growths of ancient times. Wood, charcoal have been mostly used. Carbon 14 has a half-life of about 5600 years. Geiger counters are used to mea re the intensity of discharge compared to normal living discharge, and this date the samples.

This emanation of energy from living persons, animals and vegetation may be what makes the 'homing instinct' in dogs, pigeons and other animals.

I call this to your attention, thinking that possibly you may have a correspondent specializing in such matters, and if so the above two incidents may aid him in his researches.

".. All efforts on my part to ferret out the true facts regarding Capt. Mantell's body have gone for naught. I have heard all the rumours but the one that seems to persist embraces the idea that Mantell's body was completely shredded while in flight - i.e., during the disintegration of his plane. The explosion or collision (or running afoul of the force field) must have been terrific, and all evidence points to extreme violence and something extra-conventional. Perhaps this incident was the turning point for the Air Force -- being scared, they turned on the censorship full throttle - and so it remains to this day, as more and more ugly evidence continues to come in. . . "

"Speaking of the 'other side', there seems to be a good deal of hostility concerning information from psychic means and yet we feel that not enough such information comes through. It seems a shame that you cannot print more of what the Probert Controls have to say. Of course it takes money but the info is so important and not to be found anywhere else. There may be a lot of Associates who don't care for it but then there are a lot who do. . . I hope New Worlds Behind the Atom will soon find a publisher

---(438½ Linden Ave.).

Dan Fry answers )
questions. From )
Vimana, Oct. '55)

- "This particular ship was not from any planet or system.. These ships are very large ... practically planetoids themselves and since they are closed systems it is simple to produce all necessities of life aboard the craft itself. A babe born on the Queen Mary, for instance, could live all its life aboard the ship... Such a ship does not need to be on a planet or on the ocean. The extra-terrestrials do touch various planets, for purpose of acquiring new materials for construction."

(Note: The Probert Controls asserted some five years ago that some of the space ships were as large as planets, and that the descriptions of such craft in Oahspe were essentially correct. This does not conflict in any way with the "mat & Demat." interpretation. ml).

(VIMANA, pub. at 6432 Cass Ave.,Detroit 2, Mich. Henry Maday, Editor). .25 ea.

QUOTE FOR CALIFORNIANS: (Associate George Wilson sends us a clip from "Time", of November 7, 1955)--

"A famous possession in which California takes no particular pride is the San Andreas Fault, a great crack in the bedrock that leads from the Mexican border to Point Arena, 110 miles northwest of San Francisco, and out to sea. When the Fault slips, it causes a major earthquake. Last week Seismologist Charles F. Richter of Caltech outraged Chambers of Commerce by warning that the San Andreas Fault has been gathering pressure for a major "bust-loose".

"Twice in recorded history the Fault has relieved itself. In 1857, a serious earthquake centered around Fort Tejon, north of Los Angeles. The second movement, in 1906 (some 49 years later--G.W.), leveled much of San Francisco. Since then, according to Richter, the Fault has been relatively peaceful. Minor California earthquakes have been caused by lesser Faults.

"There is evidence that pressure in the rock has been building up. Survey monuments on opposite sides of the great Fault have been pulling apart at the mean rate of 2 in. per year. Such slow shifting does not relieve forces; it is a sign that they are increasing relentlessly. Within the last fortnight, California has had two moderate earthquakes, with many lesser shocks following them. Richter does not know whether they are warning forerunners of a really big jolt. But he and his colleagues feel that the San Andreas Fault has been quiet so long that it cannot be trusted much longer."

LE GENERAL DOUGLAS )
MAC-ARTHUR DIT ... )
DIT-IL .... )

Professor NAHON, Editor of Le Courrier Inter - Planetaire (Lausanne), heads up his December 1st issue with the following item; then gives it four columns of approval:

General Douglas MacArthur, in course of an interview with the Mayor of Naples, M. Achille Lauro, on the 7th of October last, in New York, pronounced words of grave import. It is the Mayor himself who reported them to the New York Times, and Le Courrier only repeats them:

He (the General) thinks that another war would be a double suicide and that there are abundant reasons for avoiding one, on both side of the iron curtain. He thinks that because of scientific developments all the nations of earth will have to unite in order to survive, and in order to form a common front against an attack by inhabitants of other planets. The politics of the future (the General believes) will be cosmic or interplanetary in scope. . .

"Is it possible to believe (asks Professor Nahon) that a man of the General's stature and responsibilities would compromise himself by expressing ideas and views of this kind? Such a declaration implies that the General possess very precise information. And information about what, if not about the flying objects which we make it our business to discuss. No, we are not dealing with fiction here, but with sober reality. Or was it only a pleasantry, a jest? Alas, no. We have to write Alas because we know, as does the General, that certain people of outer space are hostile toward us. All we have to do is to open our eyes - and this should be the permanent task of those who are prepared: to confront the situation of the world and to warn humanity Then the masses might begin to understand what is happening. . ."
